first published in 1978 the nag hammadi library was widely acclaimed by critics and scholars alike containing many of the writings of the gnostics since the time of christ this was the work that launched modern gnostic studies and exposed a movement whose teachings are in many ways as relevant today as they were sixteen centuries ago although some of the texts had appeared in other translations the 1978 edition was the first and only translation of these ancient and fascinating manuscripts to appear in one volume this new edition is the result of ten years of additional research and editorial and critical work

every translation has been changed or added to many have been thoroughly revised unearthed in 1945 near the town of nag hammadi in upper egypt the texts literally begin where the dead sea scrolls end their discovery is seen as equally significant bringing to light a long hidden well of new information sources and insights into early judaism and the roots of christianity each text is accompanied by a new and expanded introduction also included are a revised general introduction and an afterword discussing the modern relevance of gnosticism from voltaire and blake through melville and yeats to jack kerouac and science fiction writer philip k dick the translations and introductions to the nag hammadi texts are by members of the coptic gnostic library project which includes such scholars as helmut koester george mcrae and elaine pagels

the collection of thirteen codices found in upper egypt near nag hammadi in 1946 is one of the major archaeological discoveries of our time perhaps the library of a gnostic community in late antiquity the codices are a repository of important spiritual materials from throughout the ancient world hence a thorough analysis of this new material is indispensable for any proper understanding of the history of religions in this period the rich documentation which the codices add to early coptic text material promises to raise to a new precision the historical analysis of that language this edition presents collotype reproductions in natural size of all folios of the thirteen codices as well as reproductions of the covers and photographs previously taken of fragments that are now lost
