this book gathers invited contributions from active researchers to provide an up to date overview of the geological setting of the red sea it discusses aspects ranging from historical information to modern research in the red sea and presents findings from rapidly advancing emerging fields this semi enclosed young ocean basin provides a unique opportunity to study the development of passive continental margins in order to examine the current status of that region in addition to studies on the sea itself it includes those from related fields on the littoral zone the book is of interest to geoscientists and non specialists alike

this volume presents a fully illustrated field guide for the identification of the sharks and rays most relevant to the fisheries of the red sea and gulf of aden an extensive literature review and two field surveys in the region were carried out for the preparation of this document a total of 49 sharks and 45 batoids reliably reported for the region are listed and those common in the fisheries or likely to be found through fisheries operations are fully treated the guide includes sections on technical terms and measurements for sharks and batoids and fully illustrated keys to those orders and families that occur in the region color plates for a large number of the species are included

the most detailed study of soviet military industrial espionage during the 1930s 1940s and 1950s spying aimed specifically at acquiring restricted information and materials relating to american industry technology and science
